Evaluation and Management (E/M) Codes

New (99202 – 99205) and established (99212 – 99215) client code selection is now based on an updated medical decision making (MDM) level OR time. Use the method most appropriate for the care given and results in the highest level code supported in the documentation. For further guidance on using E/M codes, see the Reproductive Health National Training Center’s E/M Job Aid.

Coding by MDM: level is based on the highest 2 out of the 3 elements:
