Patient requests IUD removal, strings are not visible

- History
  - Indicates possible expulsion
    - Ultrasound
      - IUD not visible
        - Abdominal film
          - Not visible, likely expelled
          - Refer to GYN surgeon
  - Does not indicate expulsion, twirl cytobrush in external os
    - No strings
      - Ultrasound
        - IUD in uterus, embedded
          - IUD in uterus, does NOT appear embedded
            - Try to catch strings in thread retriever (dilate cx if needed)
            - Try to catch IUD or strings with IUD hook or alligator forceps. Dilate if needed. USN guidance, if available.
          - Strings found
            - IUD removed
      - IUD removed
