

CODING FOR MANUAL VACUUM ASPIRATION ABORTION (MVA)

In an outpatient setting

Accurate coding for abortion care can vary from payor to payor. It is important to check with individual payors to determine the appropriate ICD-10 and CPT codes to use to ensure reimbursement.

ICD-10 Diagnosis Codes

Z33.2 Encounter for elective termination of pregnancy

Please check ICD-10 manual for codes for abortion with complications.

Out-Patient Procedure Codes

59840 Induced abortion, by dilation & curettage

59841 Induced abortion, by dilation & evacuation

59200 Insertion of cervical dilator (e.g. laminaria, prostaglandin; separate procedure)

76817 Transvaginal ultrasound, pregnant uterus

76815 Limited ultrasound, pregnant uterus
