Coding for Medication Abortion
In an outpatient setting

Accurate coding for medication abortion can vary from payor to payor. It is important to check with individual payors to determine the appropriate ICD-10 and CPT codes to use to ensure reimbursement.

ICD-10 Diagnosis Codes
Z33.2  Encounter for elective termination of pregnancy
*Please check ICD-10 manual for codes for abortion with complications.*

Global Medication Abortion Visit Code – HCPCS
S0199  Medically induced abortion by oral ingestion of medication including all associated services and supplies (e.g. patient counseling, office visits [initial and follow-up], confirmation of pregnancy by hCG or ultrasound to confirm duration of pregnancy, ultrasound to confirm completion of abortion) except drugs

Many payors are now using the bundled S code for a medication abortion office visit, associated services and supplies, and follow-up visit. In these cases, you must bill using the “from-through” method. This code does not include the medications, and Mifepristone and Misoprostol should still be billed separately. Ultrasound and follow-up requirements will vary by payor.

Payors that are not using the bundled S code will likely accept E/M codes, medication administration codes, and/or outpatient procedure codes.

Medication Administration Codes – HCPCS
S0190  Mifepristone, oral, 200 mg (Mifeprex®)
S0191  Misoprostol, oral, 200 mcg

Almost all payors are now using the S codes for Mifepristone and Misoprostol. Each insurance carrier may reimburse for mifepristone using a different code. The name of the drug (mifepristone), the dosage (200 mg.), and the 11-digit national drug code (NDC) from the drug package must accompany this claim. In addition, submit a copy of the drug invoice to show the cost of the drug. Some payors will allow Misoprostol to be billed per unit, up to 800 mcg. In these cases, code one unit of service per 200 mcg.

Outpatient Procedure Codes – CPT Codes
76817  Transvaginal ultrasound, pregnant uterus
76815  Limited ultrasound, pregnant uterus
76801  Transabdominal ultrasound, pregnant uterus
90385 or J2788  Micro Rhogam 50 mcg

Evaluation and Management (E/M) Codes
New (99202 – 99205) and established (99212 – 99215) client code selection is now based on an updated medical decision making (MDM) level OR time. Use the method most appropriate for the care given and results in the highest level code supported in the documentation. For further guidance on using E/M codes, see the Reproductive Health National Training Center’s E/M Job Aid.
**Coding by MDM:** level is based on the highest 2 out of the 3 elements:

<table>
<thead>
<tr>
<th>Problems</th>
<th>Data</th>
<th>Risk</th>
<th>E/M Code</th>
</tr>
</thead>
<tbody>
<tr>
<td>Minimal</td>
<td>Minimal or none</td>
<td>Minimal risk of morbidity</td>
<td>99202; 99212</td>
</tr>
<tr>
<td>Low</td>
<td>Limited</td>
<td>Low risk of morbidity</td>
<td>99203; 99213</td>
</tr>
<tr>
<td>Moderate</td>
<td>Moderate</td>
<td>Moderate</td>
<td>99204; 99214</td>
</tr>
<tr>
<td>High</td>
<td>Extensive</td>
<td>High risk of morbidity</td>
<td>99205; 99215</td>
</tr>
</tbody>
</table>

**Coding by Time**

<table>
<thead>
<tr>
<th>New Patient</th>
<th>Time</th>
<th>Established Patient</th>
<th>Time</th>
</tr>
</thead>
<tbody>
<tr>
<td>99202</td>
<td>15-29 min</td>
<td>99212</td>
<td>10-19 min</td>
</tr>
<tr>
<td>99203</td>
<td>30-44 min</td>
<td>99213</td>
<td>20-29 min</td>
</tr>
<tr>
<td>99204</td>
<td>45-59 min</td>
<td>99214</td>
<td>30-39 min</td>
</tr>
<tr>
<td>99205</td>
<td>60-74 min</td>
<td>99215</td>
<td>40-54 min</td>
</tr>
</tbody>
</table>

-25 Use this modifier with the appropriate E/M code to indicate that significant and separately identifiable E/M was provided on the same date of service as a procedure.

**Telehealth Encounter Codes – CPT Codes**

-95 Use this modifier with the appropriate E/M code to indicate a real-time audio and video telehealth visit.
